1. Career Objective:

Final-year CSE student with ML internship experience at FlyRank AI and a track record of building real systems: a 92.84%-accuracy voice-toxicity pipeline, a live e-commerce platform serving 58 customers, and a CNC tool-wear thesis using LOF and One-Class SVM. Looking for an opportunity in technology where I can apply my software and data skills, learn from an experienced team, and grow across different areas of technology.

2. Projects:

1. **Real-Time Gaming Voice Toxicity Detector** | *Python · Whisper · Toxic-BERT · Wav2Vec2*
   - Built a multimodal voice toxicity detection system for gaming, fusing Whisper speech-to-text, transformer-based text classification, Wav2Vec2 emotion recognition, and voice energy analysis into a single adaptive pipeline, achieving 92.84% accuracy.
     - https://github.com/rsf-rawnak/Real-Time-Gaming-Voice-Toxicity-Detector

2. **FlyRank Content Refresh Priority Model** | *Python · pandas · scikit-learn · Jupyter · Git*
   - Built a ranking model that scores content pages by observed decline risk, so reviewers open the riskiest pages first. On a client-grouped holdout (25 train / 7 test clients, zero overlap), Logistic Regression hit Precision@50 of 0.86 vs 0.34 for the rule-based baseline. It also beat Random Forest (0.52).
   - Audited for leakage: a naive random split inflated Precision@50 to 0.92 with 31 clients leaking across train and test and deliberately adding a label-derived column pushed the score to 1.00. That confirmed the validation setup catches leakage.
     - https://github.com/rsf-rawnak/FlyRankAI-ML-Internship
     - https://rsf-rawnak.github.io/FlyRankAI-ML-Internship/

3. **WISHEND Micro Web** | *Python · Flask · SQLite · Gmail SMTP*
   - Built and deployed an e-commerce app for an apparel business (catalog, size-aware cart, automated order emails, WhatsApp link, admin dashboard) on PythonAnywhere. It has served 58 real customers over 3 months.
     - https://github.com/rsf-rawnak/Wishend-Micro-Web

4. **Spam Email Classifier** | *Python · NLP · Scikit-learn · Gradio*
   - Naive Bayes and Logistic Regression spam detector on the UCI SMS dataset, with a Gradio app that highlights spam trigger words.
     - https://github.com/rsf-rawnak/spam-email-classifier

5. **Human vs AI Project Detector** | *Python · Machine Learning · Data Engineering*
   - Built a 600-row dataset from three LLMs (Claude, Gemini, ChatGPT) and trained a classifier to separate AI-generated from human-written project submissions.
     - https://github.com/rsf-rawnak/Human-vs-AI-Project-Detector

6. **Undergraduate Thesis: Unsupervised Tool Condition Monitoring in CNC Milling** | Python · Signal Processing (FFT) · LOF · OC-SVM

- Built an unsupervised anomaly detection pipeline for CNC tool wear: FFT spectral features with Local Outlier Factor and One-Class SVM on the KIT Karlsruhe dataset. Submission: Dec 2026.

3. WORK EXPERIENCE:

Machine Learning Intern | FlyRank AI | Jul 2026 – Sept 2026

- Completed an applied-ML internship on anonymized search and engagement data (30,000 pages, 32 clients): framing, data contract, baseline, modeling, validation audit, and action playbook.
- Delivered a capstone paper and a ranked review queue for content editors. Followed strict data-use rules: no client identifiers, no causal claims.
- Received a certificate of completion and a recommendation letter.

4. Academic Qualifications:

Exam Title	Major	Institute	Location	Result	Duration
BSc. in Computer Science & Engineering	CSE	University of Asia Pacific	Dhaka	Ongoing	Jul 2022 - Ongoing
Higher Secondary School Certificate	Science	Dawood Public School & College	Jashore	GPA- 5.00	Class of 2020
Secondary School Certificate	Science	Border Guard Public School	Jashore	GPA- 5.00	Class of 2018

5. Entrepreneurship & Achievement:

- **WISHEND — Co-Founder** | 2024 – Present
  Co-founded an apparel brand, led customer acquisition (58 customers), and ran operations end to end.
  - https://linktr.ee/wishend.company
- **Champion — IDEA 4.0**, an idea generation competition organized by the Entrepreneurship and Career Development Club (ECDC).

5. Key Skills:

I. **Programming**
- Python, Java, C, C++, SQL, HTML, CSS, JavaScript

II. **Machine Learning & Data**
- Scikit-learn, NLP, Transformer Models, Gradio, HuggingFace, Data Analysis, Data Engineering

III. **Tools & Platforms**
- Visual Studio Code, MySQL, XAMPP, Git, GitHub, PythonAnywhere

6. Language (s):

Bengali (Native) **| English** (Fluent) **| Hindi** (Proficient) **| Japanese** (Elementary)

7. Reference (s):

		Reference: 01	**Reference: 02**
