1. Career Objective:

Final-year CSE student who has already built and shipped three production-level systems: a 92.84%-accuracy multimodal ML pipeline combining Whisper, Toxic-BERT, and Wav2Vec2; a live e-commerce platform that has processed real orders from 58 customers; and an ongoing thesis applying LOF and One-Class SVM to CNC tool wear detection. Looking for a team to grow with and a leader to learn from, where I can keep building and shipping models on real data.

2. Projects:

1. Real-Time Gaming Voice Toxicity Detector | Python · Whisper · Toxic-BERT · Wav2Vec2

- Built a multimodal voice toxicity detection system for gaming, fusing Whisper speech-to-text, transformer-based text classification, Wav2Vec2 emotion recognition, and voice energy analysis into a single adaptive pipeline, achieving 92.84% accuracy.

➤ <https://github.com/rsf-rawnak/Real-Time-Gaming-Voice-Toxicity-Detector>

2. WISHEND Micro Web | Python · Flask · SQLite · Gmail SMTP

- Designed and deployed a functional e-commerce web app for an apparel business — including product catalog, cart with size/subcategory support, automated order-confirmation emails, WhatsApp integration, and an admin dashboard — hosted on PythonAnywhere, serving 58 real customers over 3 months of live business operation.

➤ <https://github.com/rsf-rawnak/Wishend-Micro-Web>

3. Spam Email Classifier | Python · NLP · Scikit-learn · Gradio

- Built a spam detection model using Naive Bayes and Logistic Regression on the UCI SMS dataset, with a Gradio interface that flags spam trigger words and explains the reasoning behind each prediction.

➤ <https://github.com/rsf-rawnak/spam-email-classifier>

4. Human vs AI Project Detector | Python · Machine Learning · Data Engineering

- Merged and balanced a 600-row dataset sourced from three LLMs (Claude, Gemini, ChatGPT) to train a classifier distinguishing AI-generated from human-written project submissions.

➤ <https://github.com/rsf-rawnak/Human-vs-AI-Project-Detector>

5. Academic Coursework Projects | SQL · XAMPP · Java

- Designed a Telemedicine DB (patient/appointment records) and an Employee Management desktop app (Java, attendance tracking) — foundational SQL and OOP practice.

➤ <https://github.com/rsf-rawnak/Telemedicine-Database-Management-System>

➤ <https://github.com/rsf-rawnak/Employee-Management-System>

6. Undergraduate Thesis: Unsupervised Tool Condition Monitoring in CNC Milling | Python · Signal Processing (FFT) · LOF · OC-SVM

- Developed an unsupervised anomaly detection pipeline for CNC tool wear monitoring, applying FFT-based spectral feature extraction with Local Outlier Factor and One-Class SVM models on the KIT Karlsruhe dataset — submission targeted for December 2026.

3. Academic Qualifications:

Exam Title	Major	Institute	Location	Result	Duration
BSc. in Computer Science & Engineering	CSE	University of Asia Pacific	Dhaka	Ongoing	Jul 2022 - Ongoing
Higher Secondary School Certificate	Science	Dawood Public School & College	Jashore	GPA- 5.00	Class of 2020
Secondary School Certificate	Science	Border Guard Public School	Jashore	GPA- 5.00	Class of 2018

4. Entrepreneurship & Achievement:

- **WISHEND — Co-Founder** | 2024 – Present
 - Co-founded an apparel brand and built its e-commerce platform (see Projects) — led customer acquisition, closed deals with 58 customers, and managed operations end-to-end.
 - <https://linktr.ee/wishend.company>
- **Champion — IDEA 4.0**, an idea generation competition organized by the Entrepreneurship and Career Development Club (ECDC).

5. Key Skills:

- Programming**
 - Python, Java, C, C++, SQL, HTML, CSS, JavaScript
- Machine Learning & Data**
 - Scikit-learn, NLP, Transformer Models, Gradio, HuggingFace, Data Analysis, Data Engineering
- Tools & Platforms**
 - Visual Studio Code, MySQL, XAMPP, Git, GitHub, PythonAnywhere
- Design & Other**
 - Adobe Photoshop, Adobe Illustrator, Canva, Graphic Design, Content Writing

6. Language:

Bengali (Native) | **English** (Fluent) | **Hindi** (Proficient) | **Japanese** (Elementary)

7. Extra-Curricular Activities:

I'm currently learning Japanese, working toward Japan's industrial AI sector as a long-term career target. I also do visual design work (certified in Graphics Design), which feeds directly into WISHEND's brand and marketing. Outside of that, I stay active in anime and travel communities.

8. Reference (S):

	Reference: 01	Reference: 02
Name	Eashad Ali Molla	Dr. Nazmun Nahid
Organization	Samsung R&D Institute, Bangladesh	University of Asia Pacific
Designation	Technical Lead, Quality Experience Group	Assistant Professor
Address	West Agargaon, Dhaka	Mirpur, Dhaka
Mobile	+880 1736-290464	+880 1886-263787
