1. Career Objective:

Computer Science and Engineering graduate with hands-on experience in software development, machine learning, data analysis, and applied AI. Demonstrated ability to develop practical technology solutions and deliver measurable outcomes, including an industry project at FlyRank AI that achieved 0.86 Precision@50 against a 0.34 baseline. Proficient in Python, SQL, and modern development tools, with strong analytical and problem-solving skills and the ability to translate technical requirements into effective solutions. Seeking an entry-level opportunity in the IT and technology sector to apply my technical skills, contribute to diverse projects, and support organizational growth and innovation.

2. Projects:

I. Real-Time Gaming Voice Toxicity Detector | *Python · Whisper · Toxic-BERT · Wav2Vec2*

- Built a multimodal voice toxicity detection system for gaming, fusing Whisper speech-to-text, transformer-based text classification, Wav2Vec2 emotion recognition, and voice energy analysis into a single adaptive pipeline, achieving 92.84% accuracy.
  - ➢ https://github.com/rsf-rawnak/Real-Time-Gaming-Voice-Toxicity-Detector

II. FlyRank Content Refresh Priority Model | *Python · pandas · scikit-learn · Jupyter · Git*

- • Built a content decline-risk ranking model, achieving 0.86 Precision@50 vs. 0.34 for the rule-based baseline on a client-grouped holdout (25 train / 7 test clients, zero overlap).
  - ➢ https://github.com/rsf-rawnak/FlyRankAI-ML-Internship
- Audited for leakage: a random split inflated Precision@50 to 0.92, and a deliberately leaky column pushed it to 1.00, confirming the validation catches leakage.
  - ➢ https://rsf-rawnak.github.io/FlyRankAI-ML-Internship/

***III.* WISHEND Micro Web** | *Python · Flask · SQLite · Gmail SMTP*

- Built and deployed an e-commerce app for an apparel business (catalog, size-aware cart, automated order emails, WhatsApp link, admin dashboard) on PythonAnywhere. It has served 58 real customers over 3 months.
  - ➢ https://github.com/rsf-rawnak/Wishend-Micro-Web

IV. Spam Email Classifier | *Python · NLP · Scikit-learn · Gradio*

- Naive Bayes and Logistic Regression spam detector on the UCI SMS dataset, with a Gradio app that highlights spam trigger words.
  - ➢ https://github.com/rsf-rawnak/spam-email-classifier

***V.* Human vs AI Project Detector** | *Python · Machine Learning · Data Engineering*

- Built a 600-row dataset from three LLMs (Claude, Gemini, ChatGPT) and trained a classifier to separate AI-generated from human-written project submissions.
  - ➢ https://github.com/rsf-rawnak/Human-vs-AI-Project-Detector

VI. Undergraduate Thesis: Unsupervised Tool Condition Monitoring in CNC Milling | Python · Signal Processing (FFT) · LOF · OC-SVM

- Built an unsupervised anomaly detection pipeline for CNC tool wear: FFT spectral features with Local Outlier Factor and One-Class SVM on the KIT Karlsruhe dataset. Submission: Dec 2026.

3. Work Experience:

I. Machine Learning Engineer Intern | FlyRank AI | Jul 2026 – Sep 2026 | Hybrid

- Worked on anonymized search and engagement data covering 30,000 pages across 32 clients.
- Built a model in Python (pandas, scikit-learn) that ranks pages by decline risk, so editors know what to refresh first.
- Delivered a capstone paper and a ranked review queue that content editors could use directly.

II. Marketing Executive Intern | eChithi | Aug 2026 – Oct 2026 | On-site

- Handled social media & email for eChithi, posting 6 times per week.
- Supported client communication & campaigns during daily on-site work.
- Generate and applied unique marketing ideas for the company to grow and get better attention from the clint.

4. Academic Qualifications:

Exam Title	Major	Institute	Location	Result	Duration
BSc. in Computer Science & Engineering	CSE	University of Asia Pacific	Dhaka	Pending	Jul 2022 - Dec 2026
Higher Secondary School Certificate	Science	Dawood Public School & College	Jashore	GPA- 5.00	Class of 2020
Secondary School Certificate	Science	Border Guard Public School	Jashore	GPA- 5.00	Class of 2018

5. Entrepreneurship & Achievement:

- **WISHEND — Co-Founder** | 2024 – Present
  Co-founded an apparel brand, led customer acquisition (58 customers), and ran operations end to end.
  - https://linktr.ee/wishend.company
- **Champion — IDEA 4.0**, an idea generation competition organized by the Entrepreneurship and Career Development Club (ECDC).

6. Key Skills:

- **Programming**
  - Python, Java, C, C++, SQL, HTML, CSS, JavaScript
- **Machine Learning & Data**
  - Scikit-learn, NLP, Transformer Models, Gradio, HuggingFace, Data Analysis, Data Engineering
- **Tools & Platforms**
  - Visual Studio Code, MySQL, XAMPP, Git, GitHub, PythonAnywhere

7. Language (s):

Bengali (Native) **| English** (Fluent) **| Hindi** (Proficient) **| Japanese** (Elementary)

8. Reference (s):

	Reference: 01	**Reference: 02**
